

Mas Ryandika di meja belajar

$$x = \sqrt{13^2 - 12^2}$$

$$x = \sqrt{169 - 144}$$

$$x = \sqrt{25}$$

$$x = 5$$

$$y = \sqrt{20^2 - 12^2}$$

$$y = \sqrt{400 - 144}$$

$$y = \sqrt{256}$$

$$y = 16$$

Jarak 2 mobil adalah  $y - x = 16 - 5 = 11$  meter
